

# Vaibhav Palkhade

Java Developer

## OBJECTIVE

To give my best to the organization by the complete dedication and honest work to achieve organizational objectives.

## PROJECT

### SCHOOL MANAGEMENT SYSTEM.

Description: Developed a web-based application to manage student information, course registration for a fictional school. The project was developed using Java technologies, including Servlets and JDBC, as well as front-end technologies such as HTML and CSS, JS. The project also utilized MYSQL for database management and Java concepts such as OOPs for code organization and design. Exception Handling and Collection frameworks were also utilized to enhance the application's functionality.

## ROLE

- Developed a web-based School Management System using Java technologies, including Servlets and JDBC, for backend implementation.
- Utilized Object-Oriented Programming (OOPs) concepts for code organization and design.
- Implemented Exception Handling and Collection frameworks to enhance application functionality and ensure robust error handling.
- Integrated SQL for efficient database management, allowing for seamless student information management, course registration.
- Collaborated with front-end developers to integrate backend functionality with HTML, CSS, and JS for a comprehensive web-based user interface.

## CERTIFICATIONS

- **Java Developer,**  
Certified in core Java & Advance Java related technology at Jspider institute Pune
- Infosys's Springboard HTML Certifications.
- Infosys's Springboard CSS Certifications.
